ABSTRACT

This report, based on 1969 photography, updates the previous Basic Imagery Interpretation Briefs on the two major electric power plants in Kwangsi Chuang Autonomous Region, southeast China. The cutoff date for information in this report is February 1970.

No construction or dismantling has been observed at the Fu-chung and Heng-hsien hydro power plants since the previous reports. On the latest coverage neither plant appeared to be operating.

BASIC DESCRIPTION

No changes have been observed at the Fu-chung Hydro Power Plant since December 1967, the date of the latest photography used in the previous report.

No turbulence was observed in the tailrace in October 1969. However, the quality of the photography may have precluded its observation.
